

ESSENTIAL OILS for ANIMAL FEED

“With essential oils, a little goes a long way.”

Unlock the potential of nature for your animals by exploring the world of essential oils.

Düllberg Konzentra specialises in producing and refining essential oils for more than 90 years. Our essential oils fulfil the highest quality standards which we guarantee through qualification according to our GMP+ certificate (Good Manufacturing Practice Plus). In close cooperation with our suppliers and partners, we monitor the complete supply chain – from the plant to the essential oil.

Animal feed and their ingredients play a crucial role to ensure the safety of food derived from animal origin. With our essential oils we want to contribute to the health and wellbeing of the animals. Essential oils provide versatile positive effects. They are taste enhancers, appetizers and can support the animals during phases of stress.

Essential oils are natural products. Accordingly, protecting nature is one of our most fundamental, non-negotiable tasks. We employ sustainable action to secure the future of society and the foundation of our business.
